APAC

### Solution

StarWind Virtual SAN (vSAN)

*"We are satisfied with StarWind. The support is really fantastic. Whenever any issue arises, the response is very prompt, and solution is immediate."*

**Srinivas Kouda,**  
Company Representative

## Challenge

Before implementing StarWind Virtual SAN (vSAN), Siemens Logistics had a very expensive physical SAN. The company recognized the need to update its storage solution to enhance efficiency and performance.

The company had previously experienced success with StarWind vSAN in another project, which led to a high level of satisfaction. So, the StarWind solution proved to be the ideal choice, offering an economical alternative without compromising on performance or functionality.

## Solution

The new setup powered by StarWind vSAN met all requirements and ensured efficient storage management. Notably, the cost-effectiveness of the solution allowed the company to allocate resources more strategically, enhancing overall operational efficiency.

Moreover, the prompt and effective response of StarWind Support Team ensured that disruptions were minimized, leading to immediate resolutions and uninterrupted operations.

The positive experience with StarWind vSAN has positioned the company to confidently consider StarWind technologies into its future IT projects.
